

SPARIX — DEVELOPMENT WORKFLOW (FINAL VERSION)

TASK 1 — PROJECT INITIALIZATION

Goal

Create the entire project structure before writing any UI.

Create Folder Structure

SPARIX

```
|
|— index.html
|
|— pages
|   |— student
|   |— college
|   |— career
|   |— resources
|   |— developer
|   |— about
|   └— contact
|
|— css
|   |— main.css
|   |— components.css
|   |— layout.css
|   |— dashboard.css
|   |— forms.css
|   └— responsive.css
|
|— js
|   |— main.js
|   |— storage.js
|   |— ui.js
|   |— calculators.js
|   |— dashboard.js
|   └— utilities.js
|
|— assets
|   |— icons
|   |— images
|   |— illustrations
|   └— logos
```

 data

Completion Criteria

- ✓ Folder structure ready
- ✓ Empty files created
- ✓ Git repository initialized

TASK 2 — DESIGN SYSTEM

Goal

Create the visual language for the entire website.

Work

Create in:

css/main.css

Define:

- Color palette
- Typography
- Font sizes
- Container widths
- Border radius
- Shadows
- Button styles
- Input styles
- Form styles

Completion Criteria

- ✓ Every future page can use same styles
- ✓ No page-specific styling yet

TASK 3 — GLOBAL COMPONENTS

Goal

Build components used across entire project.

Files

css/components.css
js/ui.js

Create

Navbar

Footer

Sidebar

Mobile Navigation

Buttons

Cards

Tool Cards

Modal

Toast Message

Loader

Search Bar

Completion Criteria

Create a test page:

test-components.html

Verify every component works.

Only then continue.

TASK 4 — HOME PAGE

Files

index.html

Build

Hero Section

Features Section

Student OS Preview

College Hub Preview

Career Hub Preview

Developer Hub Preview

Roadmap Section

CTA Section

Footer

Completion Criteria

- ☒ Responsive
- ☒ Navbar working
- ☒ Footer working
- ☒ All buttons linked

TASK 5 — ABOUT PAGE

File

pages/about/about.html

Build

About SPARIX

Mission

Vision

Founder Story

Future Plans

Roadmap

Completion Criteria

Fully styled and responsive.

TASK 6 — CONTACT PAGE

File

pages/contact/contact.html

**Build**

Contact Form

Feedback Form

Bug Report Form

Feature Request Form

Social Links

JS

Validate all forms.

Completion Criteria

All forms working.

TASK 7 — STUDENT DASHBOARD

Files

pages/student/dashboard.html

Build

- Sidebar
- Dashboard Layout
- Quick Actions
- Widgets
- Statistics Cards
- Recent Activity

No Tools Yet

Only dashboard structure.

Completion Criteria

Dashboard layout finished.

TASK 8 — POMODORO TIMER

Files

pages/student/pomodoro.html

JS

Create:

js/pomodoro.js

Features

Start

Pause

Reset

Focus Session Counter

Sound Alert

Completion Criteria

Fully functional timer.

TASK 9 — TASK MANAGER

Files

pages/student/tasks.html

JS

js/tasks.js

Features

Add Task

Edit Task

Delete Task

Priority

Status

Save to Local Storage

Completion Criteria

Tasks remain after refresh.

TASK 10 — ASSIGNMENT TRACKER

Files

pages/student/assignments.html

JS

js/assignments.js

Features

Assignment Name

Subject

Deadline

Progress

Completion Status

Completion Criteria

Assignments stored locally.

TASK 11 — STUDY PLANNER

Files

pages/student/planner.html

Features

Daily Planner

Weekly Planner

Monthly View

Completion Criteria

Planning data saved.

TASK 12 — NOTES SYSTEM

Files

pages/student/notes.html

JS

js/notes.js

Features

Create Note

Edit Note

Delete Note

Search Notes

Categories

Completion Criteria

Notes saved in browser.

TASK 13 — FLASHCARDS

Files

pages/student/flashcards.html

JS

js/flashcards.js

Features

Create Card

Edit Card

Delete Card

Flip Animation

Review Mode

Completion Criteria

Fully usable flashcard tool.

TASK 14 — STUDY STATISTICS

Files

pages/student/statistics.html

Features

Study Hours

Focus Sessions

Productivity Score

Streak Counter

Completion Criteria

Statistics generated from stored data.

TASK 15 — COLLEGE DASHBOARD

File

pages/college/dashboard.html

Build

Overview Page

Quick Access Cards

Academic Summary

Completion Criteria

Navigation to all college tools.

TASK 16–24 — COLLEGE TOOLS

Each tool gets:

One HTML

```
attendance.html
gpa.html
cgpa.html
sgpa.html
marks.html
grade-predictor.html
timetable.html
exam-countdown.html
```

One JS

```
attendance.js
gpa.js
cgpa.js
sgpa.js
marks.js
grade.js
timetable.js
countdown.js
```

Rule

Every tool must be:

☒ Functional

✓ Responsive

✓ Validated

✓ Tested

before next tool begins.

TASK 25 — RESOURCES DASHBOARD

File

pages/resources/dashboard.html

Build

Resource Categories

Search

Filters

Downloads

TASK 26–30 — RESOURCE MODULES

Create:

notes-repository.html

study-materials.html

semester-resources.html

subject-resources.html

downloads.html

Each page fully completed before next.

TASK 31 — CAREER DASHBOARD

File

pages/career/dashboard.html

Build

- Overview
- Quick Access
- Progress Cards

TASK 32 — RESUME BUILDER

File

resume-builder.html

JS

resume.js

Features

- Personal Details
- Education
- Skills
- Projects
- Experience
- Preview

Completion Criteria

Resume generated dynamically.

TASK 33–38 — CAREER MODULES

Create one-by-one:

resume-templates.html

resume-export.html

ats-checker.html

portfolio-generator.html

internship-tracker.html

placement-tracker.html

Do not start next tool until previous one works.

TASK 39 — DEVELOPER DASHBOARD

File

pages/developer/dashboard.html

Build

Tool Categories

Tool Cards

Search

TASK 40–50 — DEVELOPER TOOLS

One tool at a time.

Example

JSON Formatter

Files:

json-formatter.html

js/json.js

Complete.

Test.

Then move.

Same process for:

- JSON Validator
- Regex Tester
- Unit Converter
- QR Generator
- QR Scanner
- Markdown Previewer
- Color Palette Generator
- Gradient Generator
- Password Generator
- Snippet Manager

TASK 51 — FULL RESPONSIVENESS PASS

Now go through every page.

Fix:

- Mobile
- Tablet
- Desktop

Only now create:

css/responsive.css

TASK 52 — DARK MODE

Files:

js/theme.js

Create:

- Dark Mode
 - Light Mode
 - Theme Persistence
-

TASK 53 — ANIMATIONS

Create:

css/animations.css

Add:

- Hover Effects
 - Page Transitions
 - Card Animations
 - Modal Animations
-

TASK 54 — SEO

Add:

- Meta Tags
 - Titles
 - Descriptions
 - Open Graph Tags
 - Favicon
-

TASK 55 — OPTIMIZATION

Compress:

- Images

- CSS
- JS

Remove unused code.

TASK 56 — COMPLETE TESTING

Test every:

- Link
 - Button
 - Form
 - Tool
 - Calculator
 - Mobile Layout
-

TASK 57 — DEPLOYMENT

Deploy.

Buy domain.

Connect hosting.

Launch SPARIX.

IMPORTANT BUILD RULE

For every task:

1. Create HTML
2. Create UI
3. Create CSS
4. Create JavaScript
5. Add Local Storage
6. Test
7. Make Responsive
8. Mark Complete
9. Move to Next Task

Never leave a page 50% finished.

Finish one feature completely before starting another. That approach will keep a project of this size manageable and prevent dozens of half-built pages from piling up.
